

On October 1, 2020, RBdigital ebooks and audiobooks are moving over to Libby, the reading app from OverDrive. With OverDrive, you will continue to browse, borrow, and enjoy all the same great ebooks and audiobooks you loved in RBdigital.

Transition from RBdigital

The transition process could take up to 24 hours. Once the transfer is complete, you will be able to access ebooks and audiobooks in the Libby app.

Remember if you currently have a book checked out in the RBdigital app, it will be available through the remainder of the lending period, so you can finish your title without disruption or risk of losing your place in the book.

Your holds will not transfer from RBdigital, and your wish list and checkout history will not move to Libby.

Preparation for Libby

Do not rush out and purchase a new reader. Devices like Paper White are reputed to work with Libby!

It is not too early to download the Libby app from your app store and install it on your devices. However, our library will not show as available until the transfer has been completed. You will need to search for Greater Clarks Hill Library System in Libby.

If you currently have holds with RBdigital, holds will not be moved to Libby. You will need to place any ebook and/or audiobook on hold again in Libby. If you want a record of your RBdigital holds, you can export your Transaction History from the RBdigital website under *My Account > Profiles*.

In addition, your wish list and checkout history will not be moved automatically to Libby. You will be able to recreate your wish list using tags in Libby and mark titles you have already read using tags in Libby. You can export your Transaction History from RBdigital websites under *My Account > Profiles*.

Only ebooks and audiobooks will be moved to Libby at this time. Please continue to use RBdigital for other types of digital content from our library. We will let you know when these are ready to transfer to Libby.

Conclusion

Our library is proud to continue to offer you a wide selection of digital titles for you to access anytime, anywhere through Libby, the one-tap reading app. We appreciate your patience in transitioning to Libby.
